

DIEBOLD NIXDORF REVENDO 9020

COMPREHENSIVE, MODULAR REVERSE VENDING SOLUTIONS FOR REFILLABLES, NON-REFILLABLES AND CRATES

Turn reverse vending into a sales opportunity—traditional in-store reverse vending solutions represent a missed opportunity for customer engagement. How can large retailers transform the recycling stage of the customer journey into a sales-driver? With the Revendo 9020—the newest generation in reverse vending solutions from Diebold Nixdorf—retailers can link reverse vending transactions with in-store promotions, loyalty points and much more. Equipped with both the capacity and comprehensive reverse vending options that large store formats demand, the solution enables retailers to process large volumes of cans, bottles and crates while engaging customers with coupons, loyalty rewards and tailored advertisements via an intuitive user interface on a 8.4" touch screen.

EFFICIENCY BY DESIGN

Designed with the needs of large retail environments in mind, the Revendo 9020 offers space-saving back-office components in a through-the-wall configuration. With the latest 3D stereovision scanners, the front-end of the solution is highly compact. Utilizing energy-efficient technologies, the Revendo 9020 enables comprehensive, cost-effective instore reverse vending solutions. With ultra-high capacity compactors in the back-office, retailers can set a larger interval between the periods for removing empties—minimizing labor requirements and freeing in-store personnel to focus on delivering high-quality customer service. Furthermore, the new modular backroom components

increase the flexibility of solutions to transport, collect and compact beverage containers.

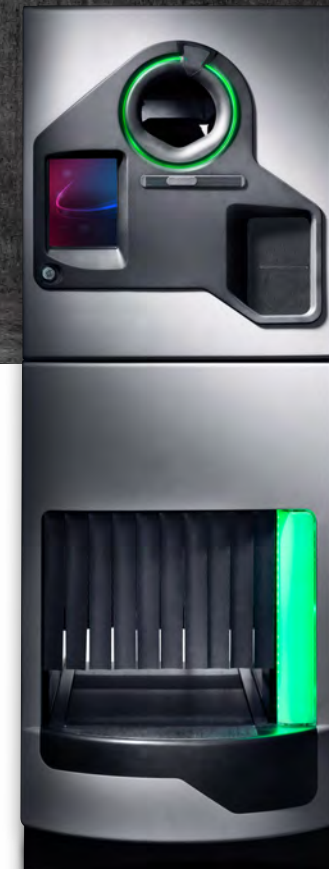

DRIVE SALES AND REDUCE TOTAL COST OF OWNERSHIP

By installing intelligent RVPlus software applications on the Revendo 9020, retailers can enable value added features that shrink total cost of ownership. With a comprehensive range of software solutions for tailored couponing, loyalty-card rewards, advertising and more, retailers can drive same-day sales at the reverse vending machine. With complete and transparent integration with every in-store point-of-sale system, the solution enables retailers to

offer a seamless customer journey, without compromising on security.

PROTECT THE ENVIRONMENT

Built on decades of industry experience, Diebold Nixdorf reverse vending solutions recycle more than €45 or \$47 million worth of PET (polyethylene terephthalate) products every year. With Revendo 9020 solutions, retailers can simultaneously protect the environment and drive the commercial benefits of reverse vending. CONSULTING AND INTEGRATION

Our focus is to provide our customers with the best business benefits as quickly as possible. To make this happen, our Professional Services practice can provide analysis and concept design services to define the ideal deployment and integration scenario for your business requirements. We will also deliver integration services as part of our Professional Services portfolio to ensure the smooth and timely deployment of systems throughout your store network.

SWAP-SERVICE

Diebold Nixdorf's service organization ensures high availability of all Revendo systems. Experienced field service engineers that can directly access OEM spare parts enable fast system recovery, according to the agreed contractual details.

WHY DIEBOLD NIXDORF?

With an installed base of more than 1 million ePOS systems worldwide, Diebold Nixdorf provides leading technologies for automating checkout processes and engaging consumers. Our local presence in more than 130 countries positions us to better understand the market needs of today and anticipate those of tomorrow. We leverage our expertise in seamless omnichannel retailing, store transformation and global delivery excellence, to help retailers achieve their business objectives. We enable a convenient, seamless checkout and shopping experience for consumers who desire consistency across all channels from store to mobile and beyond.
